2009 Lyme-Autism Connection Conference

FROM
ROADBLOCKS TO
Recovery

JUNE 25-28, 2009

Radisson Fort McDowell Resort and Casino
Scottsdale-Fountain Hills, Arizona

This cutting edge conference focuses on intermingling traditional and alternative biomedical treatment for children and adults affected by Borrelia, Multiple-infections and or Autism Spectrum Disorder, Asperger's Syndrome, and ADHD.

Join us for – FROM ROADBLOCKS TO RECOVERY

Out of the 2008 Lyme-Autism Connection Conference came a new focus: we will increase our education for practitioners. Why? Families tell us they may see limited progress in the various treatment protocols, but they see a big jump in results when they work with an integrative practitioner who possesses cutting edge education. Several doctors who were first time attendees at the 2008 Lyme-Autism Connection Conference said they were "blown away" by the many aspects of the epidemic and the speed at which new information is coming to the forefront. Patients who attended had a full toolbox of information to take back to their doctors.

Data shows a growing number of families are affected by Autism or by Lyme disease, and many children have both diagnoses. This conference focuses on intermingling traditional and alternative biomedical treatment for children and adults affected by Borrelia, multiple-infections and/or Autism Spectrum Disorder, Asperger's Syndrome, and ADHD. You will hear presentations about environmental insults which exacerbate symptoms in these disorders. You will hear presentations with the newest scientific data. CME credits are available. Additionally, we estimate about 40 vendors. Conference participants tell us we are "10 years ahead" of other conferences because of the vast amount of cutting edge information provided.

About LIA Foundation

We are a non-profit public benefit charity and under 501c3 status of the IRS.

We are a grass roots organization committed to mobilizing the Lyme and Autism Communities to find answers for these children.

Our mission consists of:

1. To encourage, through our awareness programs, parents, physicians and the community on the importance of testing for Borrelia, Mycoplasma and many multiple-infections in their children with Autism Spectrum Disorder.

- 2. To educate the Autism community, both doctors and parents, and others on which treatments are available, how to find a doctor knowledgeable in Borrelia, Mycoplasma and multiple-infections and connect parents with mentors who can help guide them through their journey.
- 3. To help coordinate future medical studies to help with future treatments, information and education to the community.

About CHOICE

CHOICE is the voice of Arizona's patients and doctors, an organization born in Arizona in 2007 to ensure that a wide array of choices is available in medical care. www.ChoiceForHealthonline.com CHOICE advocates for:

- Ability for doctors to pursue advanced treatments that go beyond the conventional Standard of Care which is shaped in large measure by the pharmaceutical industry.
- Emphasis on prevention and attainment of good health, not just "disease management" with costly interventions and drug prescriptions.
- Recognition that food is our best medicine. We need access to food that is free of pesticides/hormones/steroids, free of genetic modification, grown in nutrient rich soil. We need unfettered access to unprocessed food that has not been denatured for longer shelf life.
- Availability of a wide range of supplements including herbs, vitamins, and homeopathic remedies.
- Truth in labeling so we know when MSG and other additives are present in foods.
- Ability to accept or deny vaccinations for our children; those who feel vaccines and their components contribute to health problems should not be threatened with jail if they choose not to vaccinate.
- Full disclosure about medical microchips that would be implanted in the name of "safety."

THURSDAY

FRIDAY

SATURDAY

SUNDAY

PHYSICIANS TRAINING DAY Thursday, June 25, 2009

- 7:00 Registration/Exhibits Open
- 8:30 - 8:45 Welcome
- 8:45 - 12:15 Morning Sessions
- 12:15 - 1:45 Lunch and Exhibits
- 1:45 - 6:15 Afternoon Sessions
- 7:30 - 10:00 Doctor's meet and mingle reception

THURSDAY PRESENTERS

- Ann Corson, MD**
Pediatric Tick Borne Disease - Presentation and Management
- Stephen Fry, MD**
Evidence of vector borne disease and epierythrocytic bacteria in Chronic Fatigue Syndrome, Fibromyalgia, Autoimmune Disease, and Autism
- Donna Jackson Nakazawa**
The Autoimmune Epidemic: What You Need to Know

Victoria Bowmann, PhD
Start in the Gut: An overview of cleansing, role of colon for liver detoxification and the value of rectal probiotics

Pramila Srinivasan, PhD
An online web-based system for treatment tracking, visualization and analysis for parents and physicians. CHARM (Children's Autism Recovery Map)

David Berg, MD
Blood flow in Lyme, ASD and other conditions

Dr. Lawrence A. Klapow, PhD
Varestrongylus klapowi, a New Zoonotic Parasite from Grazing Animals Found in CFIDS and Lyme Patients

Lee Cowden, MD, MD(H)
Electro-Dermal Screening and Urine Dipstick to Predict Genetic SNP's in Autism and Response to Treatment

GENERAL SESSION Friday, June 26, 2009

- 7:00 Registration/Exhibits Open
- 8:30 - 8:45 Welcome
- 8:45 - 12:30 Morning Sessions
- 12:30 - 1:45 Lunch and Exhibits
- 1:45 - 5:30 Afternoon Sessions
- 7:00 Dinner Keynote and Networking Event

FRIDAY PRESENTERS

- Jeff Wulfman, MD**
The Parasite Paradigm: The complex web of Lyme Borreliosis and chronic infections
- Heidi Noyer, MS, LPC, LCDC**
Shares how she "Tackled Roadblocks to Recover" her Children
- Lee Cowden, MD**
Autism Treatment Basics
- Vicki Warren**
Creating Healthier Home

Claire Riendeau, ND, NMD, DiHom
Mold & Chemical Toxicity 101: How they impact your health and what to do about them

Pramila Srinivasan, PhD
An online web-based system for treatment tracking, visualization and analysis for parents and physicians. CHARM (Children's Autism Recovery Map)

Friday Night Networking Dinner
